STEINMÜLLER ENGINEERING CELEBRATES COMPANY ANNIVERSARY

“The Engineers Company“ in Gummersbach celebrates it’s young, successful history and gets geared up for the future

Steinmüller Engineering GmbH can look back on 15 years of success. Founded in 2003, with a small staff compliment, the now internationally renowned company currently employs more than 130 people.

"Over the last few years, we have established ourselves successfully in a challenging market environment. We are very proud of this. An important success factor is our employees to whom we are thankful. We continue to focus on sustainable personnel development and are increasingly training junior staff ", confirmed the two managing directors Hans-Ulrich Thierbach and Shinichi Takano. With a party at the "Wyndham Garden", Gummersbach the special occasion was celebrated. Eighty invited guests took part in the event, amongst them personalities from business and politics such as Shinobu Nakamura Chairman of SE-Control Board, Frank Helmenstein, mayor of the city of Gummersbach and leading representatives of international companies from the energy sector.

The anniversary brochure is available. Please follow [Anniversary brochure](#).

Employees of Steinmüller Engineering were involved in the development, construction and operation of numerous energy and environmental technology projects of the former L & C Steinmüller GmbH as well as many comparable projects of Steinmüller Engineering GmbH in Gummersbach.

THE ENGINEERS COMPANY

To further sharpen our profile, the company logo will be developed in our anniversary year. "**The Engineers Company**" emphasizes the large and highly specialized process know-how of our employees in the field of energy and environmental technology. The company is a wholly owned subsidiary of IHI Corporation, headquartered in Tokyo, Japan. The portfolio includes engineering and supply for the modernization of power plants, thermal industrial plants and components for chemical plants. The necessary concepts are based on fact, technical possibilities and the economically feasible.

„Our company is well positioned for the future. We have many years of experience to successfully support our customers in coping with their demanding tasks and are optimistic about the challenges ahead.“

Dr. Hans-Ulrich Thierbach and Shinichi Takano - Managing Directors
